7 Automated decision making

Profiling for marketing

We want you to get the most relevant information about products and services at the right time. The most effective way for us to do this is to use automated processes to create a profile of you for marketing.

To carry out marketing profiling we use information you give to us, details about how you have used other products and services you have with us or the Group and any feedback you have given us, information we have obtained from credit reference agencies and other external data sources and information from other companies we are partnering with.

We use processes to analyse this information to decide what products and services to offer to you and to prioritise the marketing messages you receive by; assessing your eligibility for those products and services; assessing how likely they are to be useful for you; and deciding how likely you are to respond.

We use an artificial intelligence programme, which uses data that you have provided or that we have collected from you from use of your account. We use this information to create models based on the performance of previous promotional initiatives, so that we can predict the likely success of future promotions generally, but this information is not used to make any specific decisions about you as an individual.

The partners we pass your personal information to for marketing might also carry out marketing profiling using your personal information for these purposes.
